

SWIM Instrument and FROGS current status

Cédric Tourain*¹ and Jean-Michel Lachiver*¹

¹CNES – France

Abstract

In this presentation, in a first part, the current status of CFOSAT SWIM instrument will be done. This status shows the instrument healthiness, its performances and the main events that have occurred since the launch of the mission. In addition, a CalVal status of SWIM products is proposed including: main evolutions in the processing, current products performances and foreseen activities.

In a second part, a status of the French Oceanographic Ground Segment (FROGS) is presented including the following topics: processing chains status (SWIM & SCAT), production performances, System performances, SWIM reprocessing, products access & distribution and IWWOC (Ifremer Wind and Wave Oceanographic Centre).
